M.A. Ford® New Cutting Data App

Available for iOS and Android, the new cutting app has everything you need right at your fingertips.

Our interactive app for iOS and Android devices makes tool cutting data calculations simpler and faster by minimizing text input and using 3D graphics that respond instantly to changing cutting parameters, using smart phone or tablet touch screens.

M.A. Ford® TuffCut® 3D 250 Series 2 Flute Ball Nose

The TuffCut® 3D 250 series tools feature our ALtima® Blaze coating along with high performance cutting geometries, and a precision nose radius, making them an excellent choice for both roughing and precise 3D finishing applications.

The 250 2-flute ball nose end mill is the latest addition to our TuffCut® 3D range of ball nose tooling, which delivers excellent results in 3D machining and slotting.

Created for roughing & finishing applications in alloy steels & hardened steels (<50 HRC), as well as various stainless steel & titanium grades, the 2-flute precision radius design provides excellent swarf evacuation, & precise 3D finishing. The Series 250 is an economical & cost-effective solution for lower volume machining operations.
