M.A. Ford[®] Advanced Product Group

You may have noticed the Advanced Product Group logo appearing on brochures for awhile now. What is it?

The APG logo is used to identify tools that are designed for specific materials and applications with high performance geometrics, are ideal for medium to large volume production and are ideal for tough to machine materials. APG tooling is designed for ultimate high performance, long-life and extended production runs to deliver exceptional productivity levels.

When absolute performance, precision and productivity are essential, our APG, advanced products are the 'go-to' choice for thousands of manufacturing businesses across the globe. Exceptional speeds & feeds, long life and outstanding performance all come as standard.

M.A. Ford[®] TuffCut[®] XR-AL 334 Series

Machining aluminum? Try our 334 end mill. Combining our high performance Gem+ coating with a variable helix, 3 flute chip breaker design, the center cutting TuffCut[®] XR-AL 334 end mill is the perfect solution for roughing aluminum.

The 334 delivers improved chip control and excellent wear resistance while maintaining the sharpness of the cutting edges. It has an extended tool life and improved finish, when compared to traditional knuckle roughers, but can also be used for HEM and slotting applications, delivering high metal removal rates.
